

# **AutoCAD Level 2**

## **Session 04**

# AGENDA

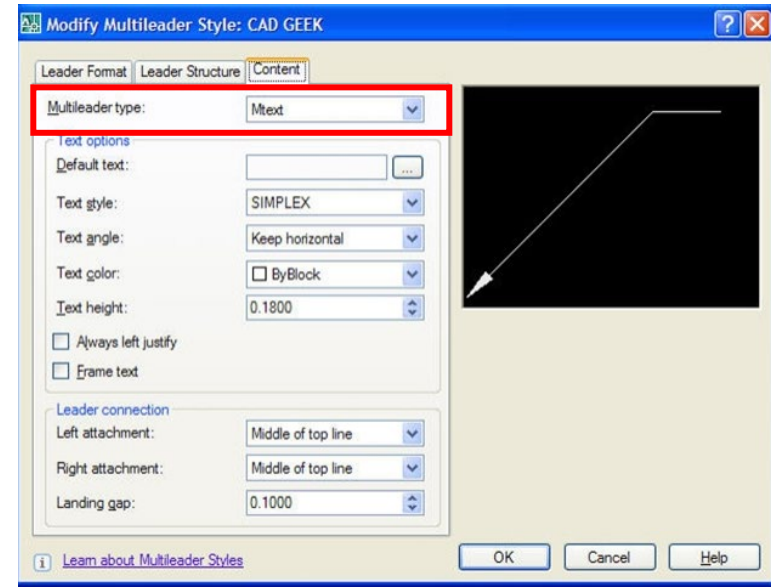

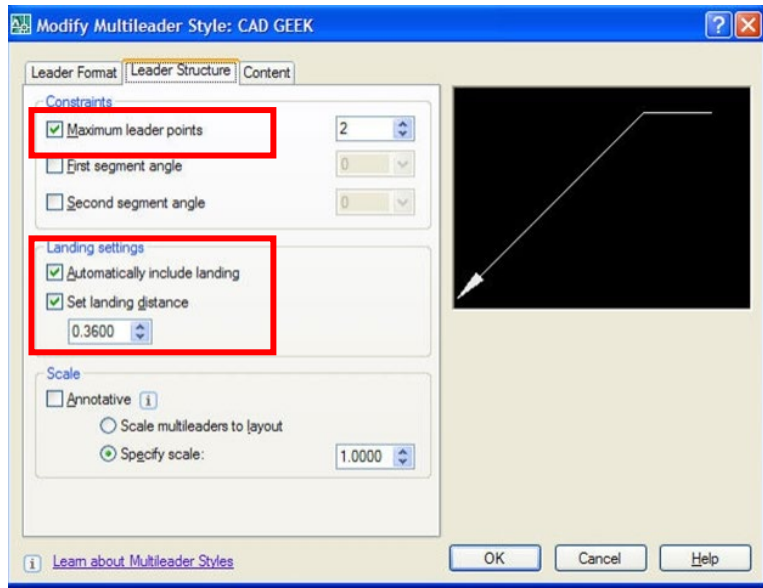

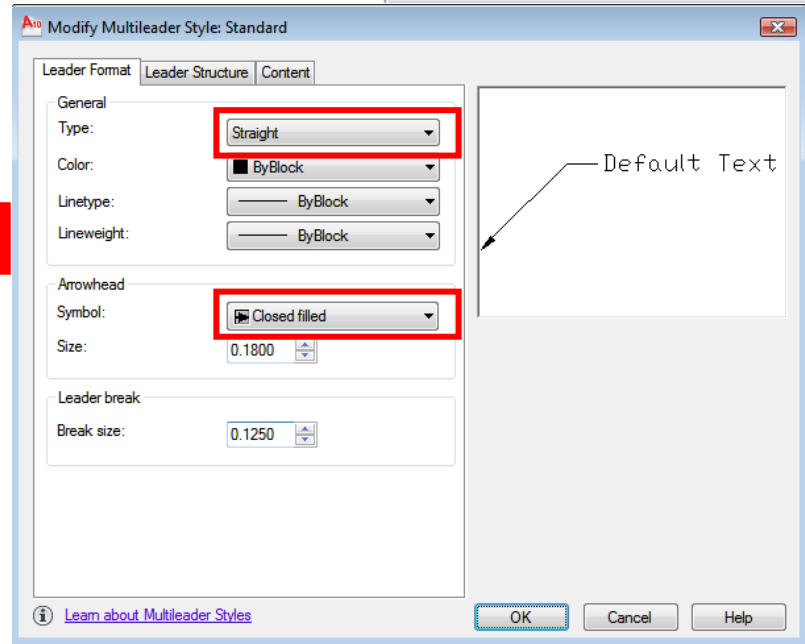

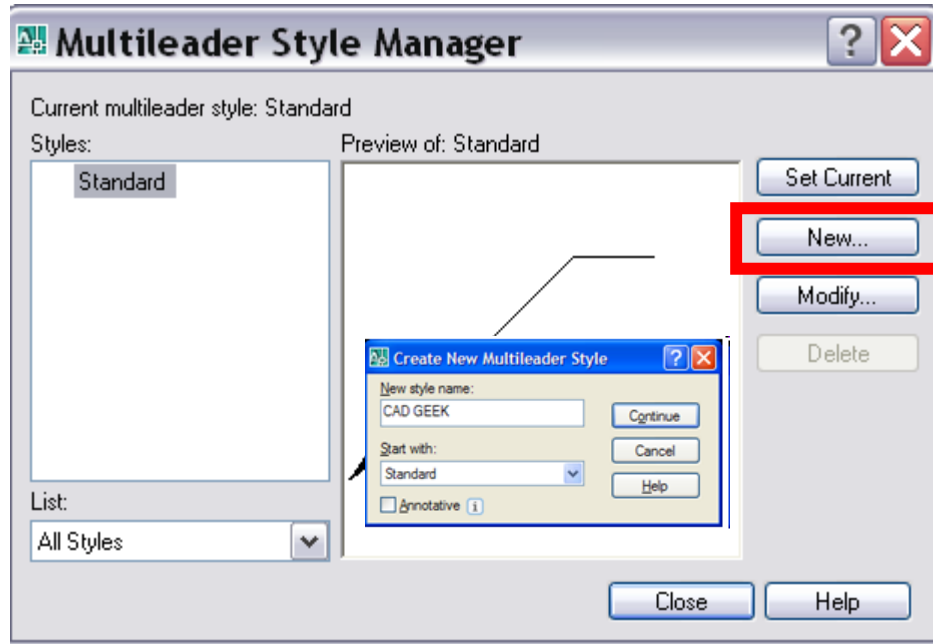

- **Adding More Annotations**
  - **Multi leaders**
  - **Hatch**
  - **Attributes**
  - **Fields**
- **Tool Palette**

# Using Multiline leaders

- A leader object typically consists of an arrowhead, an optional horizontal landing, a leader line or curve, and either a multiline text object or block.
- You can create a leader line from any point or feature in a drawing and control its appearance as you draw. Leaders can be straight line segments or smooth spline curves.

# Multileader Style Manager

# Annotative Hatch

- Hatch patterns are commonly used to symbolize materials.
- Some hatch patterns need to be annotative and some do not.

**NOT ANNOTATIVE**

**ANNOTATIVE**

# Filling in a title block

- Typical title block may consist of:
  - **Text**- Does not change at any time
  - **Attributes**- may change on each page
  - **Fields**- Does not change from page to page but may change from project to project
